

Wickless Candle Instructions

Daily Use

- Remove lid from candle.
- Turn on candle warmer and allow candle to melt – this will take approximately 1 hour.
- When finished, turn off the warmer, allow the wax to harden, and then replace the lid until the next use. (Recommended use can be 6 to 8 hours per day)
- Keep your candle out of direct sunlight.

Adding Refresher Oils -- (Add while in liquid form and mix gently.)

- As needed, add a few drops of the ½ ounce bottle of fragrance oil to the melted wax. Stir thoroughly. Let wax harden and then replace lid and let sit overnight for best results.
- Repeat as necessary until bottle has been depleted, then discard candle and wax.

Caution! Never add any additional fragrance oil beyond the ½ ounce mentioned above, as the wax may not properly absorb the oil, making the candle unsafe.
